LYNK&CO

# Intelligent Assisted Driving

High computing power, blind-spot-free safety,  
Smart control across long distances, mastering all terrains.

## Intelligent Driving Assist System

1 LiDAR | 1 Forward-Facing Millimeter-Wave Radar | 4 Side Millimeter-Wave Radars | 11 Vision Sensor | Orin X Chip | Autonomous Emergency Braking (AEB) | Run-flat Technology

## Flagship Revolutionary Cabin

Versatile space for multiple scenarios. Comfort cabin redefining living aesthetics.  
Immersive soundscape enabling a new intelligent experience.

### MPV-level space experience

Flat floor layout.  
1.3 m child stand-up height movement.  
One-touch access for entry and exit.

### Versatile space

Second-row slide travel: 550 mm.  
Third-row slide travel: 125 mm.  
Passenger seat with electric adjustment.

### Equal comfort for all rows

Third-row seat width: 1.1 m.  
0°–155° backrest angle adjustment.  
Premium ventilated & massage seats.

# Tomorrow Technology Intelligent Cockpit

Shines with intelligent brilliance, delivering extreme intelligence and versatile smart features.

## \ Dual Qualcomm Snapdragon 8295 Intelligent Cockpit Chips

Designed to power a next-generation in-car experience with exceptional speed and precision. Featuring advanced 5 nm architecture and 60 TOPS AI computing capability. Supports intelligent six-screen interaction with fast, seamless responsiveness throughout the cabin.

## \ LYNK Flyme Auto

Technology that connects seamlessly with your digital lifestyle. Created in partnership with Meizu to deliver a smart, fluid, and fully integrated cockpit ecosystem. Thoughtfully evolving to make every interaction more intuitive, personal, and connected.

## \ Hand-Phone Connectivity

Supports Flyme Link, HUAWEI HiCar, Carlink, CarPlay. Compatible with Meizu iOS, HarmonyOS, and Android smartphones. Seamless hand-phone interaction for effortless connectivity.

## \ Intelligent Voice Vehicle Control

Supports navigation, vehicle control, multimedia, parking entertainment, and other scenarios. OTA updates supported.

### \ Harman Kardon 31-Speaker Performance Flagship Audio System

First car-grade flagship audio from Harman Kardon, 31 speakers, peak power 2640 W.96 kHz, industry-highest resolution. Supports 7.1.4 channels, Dolby Atmos. 4-zone headrest speakers form 4D surround system.

### \ Dual 30-inch Front and Rear Screens

32:10 golden ratio, immersive 6K clarity. Front and rear screens seamlessly connected. Content flows interactively across screens

### \ Soft Nappa Leather

All three rows of seats feature premium, top-grain perforated Nappa leather, offering a luxuriously soft touch with a leather softness rating of  $\geq 3.5$ , leading in its segment. The leather is antibacterial, skin-friendly, comfortable, durable, and easy to maintain.

### Dual 180° Electric Rotatable Seats

Can rotate 90° outward for easy access for elderly. 180° rear rotation enables multiple versatile scenarios. 1.7 m between rotated seat backs, creating flexible space.

6K Frameless OLED Display; Perfect for Immersive Gaming When Vehicle is Stationary

30-inch Floating Entertainment Screen

30-inch 6K All-in-one Sky Screen

6-inch rear smart control center

### 6-Screen Seamless Interaction

Dual 30-inch front and rear screens support quad-split display  
 Connects with 95-inch AR HUD, 12.66-inch LCD instrument cluster,  
 6-inch rear smart control center, and smartphone cross-screen.  
 Content flows seamlessly across screens for synchronized  
 enjoyment.

12.66-inch LCD instrument cluster

95-inch AR HUD

## Enjoy Ultimate Driving Control

Built on SPA Evo large electrified vehicle—dedicated architecture, delivering both efficiency and performance, easy to handle.

Battery capacity @1/3c

**52.38 kWh**

Maximum Pure Electric Range (NEDC)

**150 km**

0–100 km/h acceleration in

**4.6 s**

Fast charging 20%–80% in

**17 min**

Maximum Combined Power

**528 kW**

Horsepower

**710**

Total System Torque

**1038 Nm**

## EM-P<sup>®</sup> Intelligent Electric Hybrid

Balances high power with low energy consumption.

Breaks urban-offroad boundaries, flexibly handling various scenarios and working conditions.

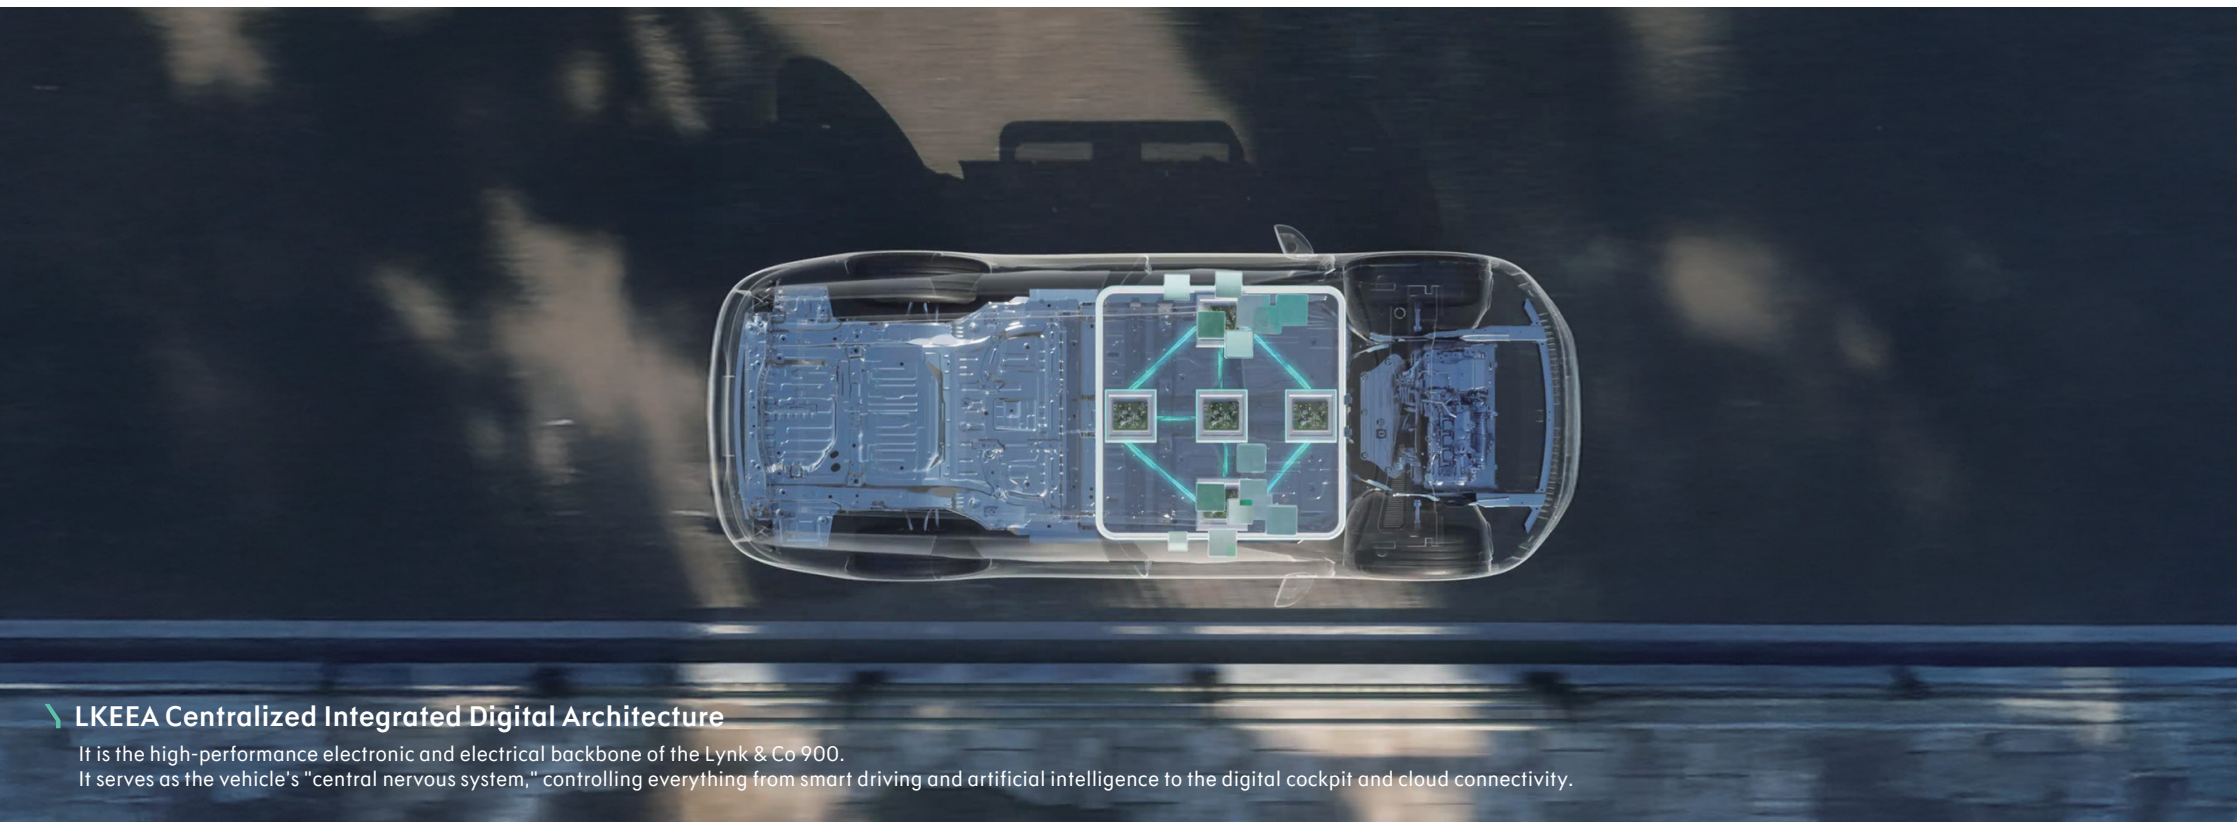

### Intelligent Magic Carpet Suspension

Active prediction senses road conditions in advance, delivering comfort "one step ahead."

### Closed Dual-Chamber Air Suspension

Single and dual chambers flexibly adjustable. Freely switch modes to meet full-scenario driving needs.

### LKEEA Centralized Integrated Digital Architecture

It is the high-performance electronic and electrical backbone of the Lynk & Co 900. It serves as the vehicle's "central nervous system," controlling everything from smart driving and artificial intelligence to the digital cockpit and cloud connectivity.

# Flagship Ultimate Safety

Equal Safety for All Three Rows | 360° Safety Fortress  
Mother & Child Grade Healthy Cabin for Comprehensive Safety Protection

↳ All Domain Safety+

**Dual 100km/h**

Rear collision superimposed  
with third-row side collision

**130km/h**

Autonomous Emergency Braking

**33.95 m**

100-0km/h braking distance

### \ Safety Fortress

Integrated hot-formed double-door rings (A/B/C/D pillars) with 100% coverage. 12,000 MPa ultra-high-strength. W-type hot-formed crash beam. Vehicle equipped with 11+1 airbags. Unique "Wheel-Saving Safety" technology protecting every trip.

### \ Mother & Child Health

**0 harmful solvents | 0 asphalt | 0 contaminated cotton**  
China's first "Mother & Child Grade Healthy Vehicle" with five authoritative certifications. TUV low-blue-light eye-protection certified. Supports rear-seat monitoring via sensing cameras for child safety. Mother & child grade ecological cabin with 12 airbags for full protection.

# Safety & Benchmark Engineering

Lynk & Co 900

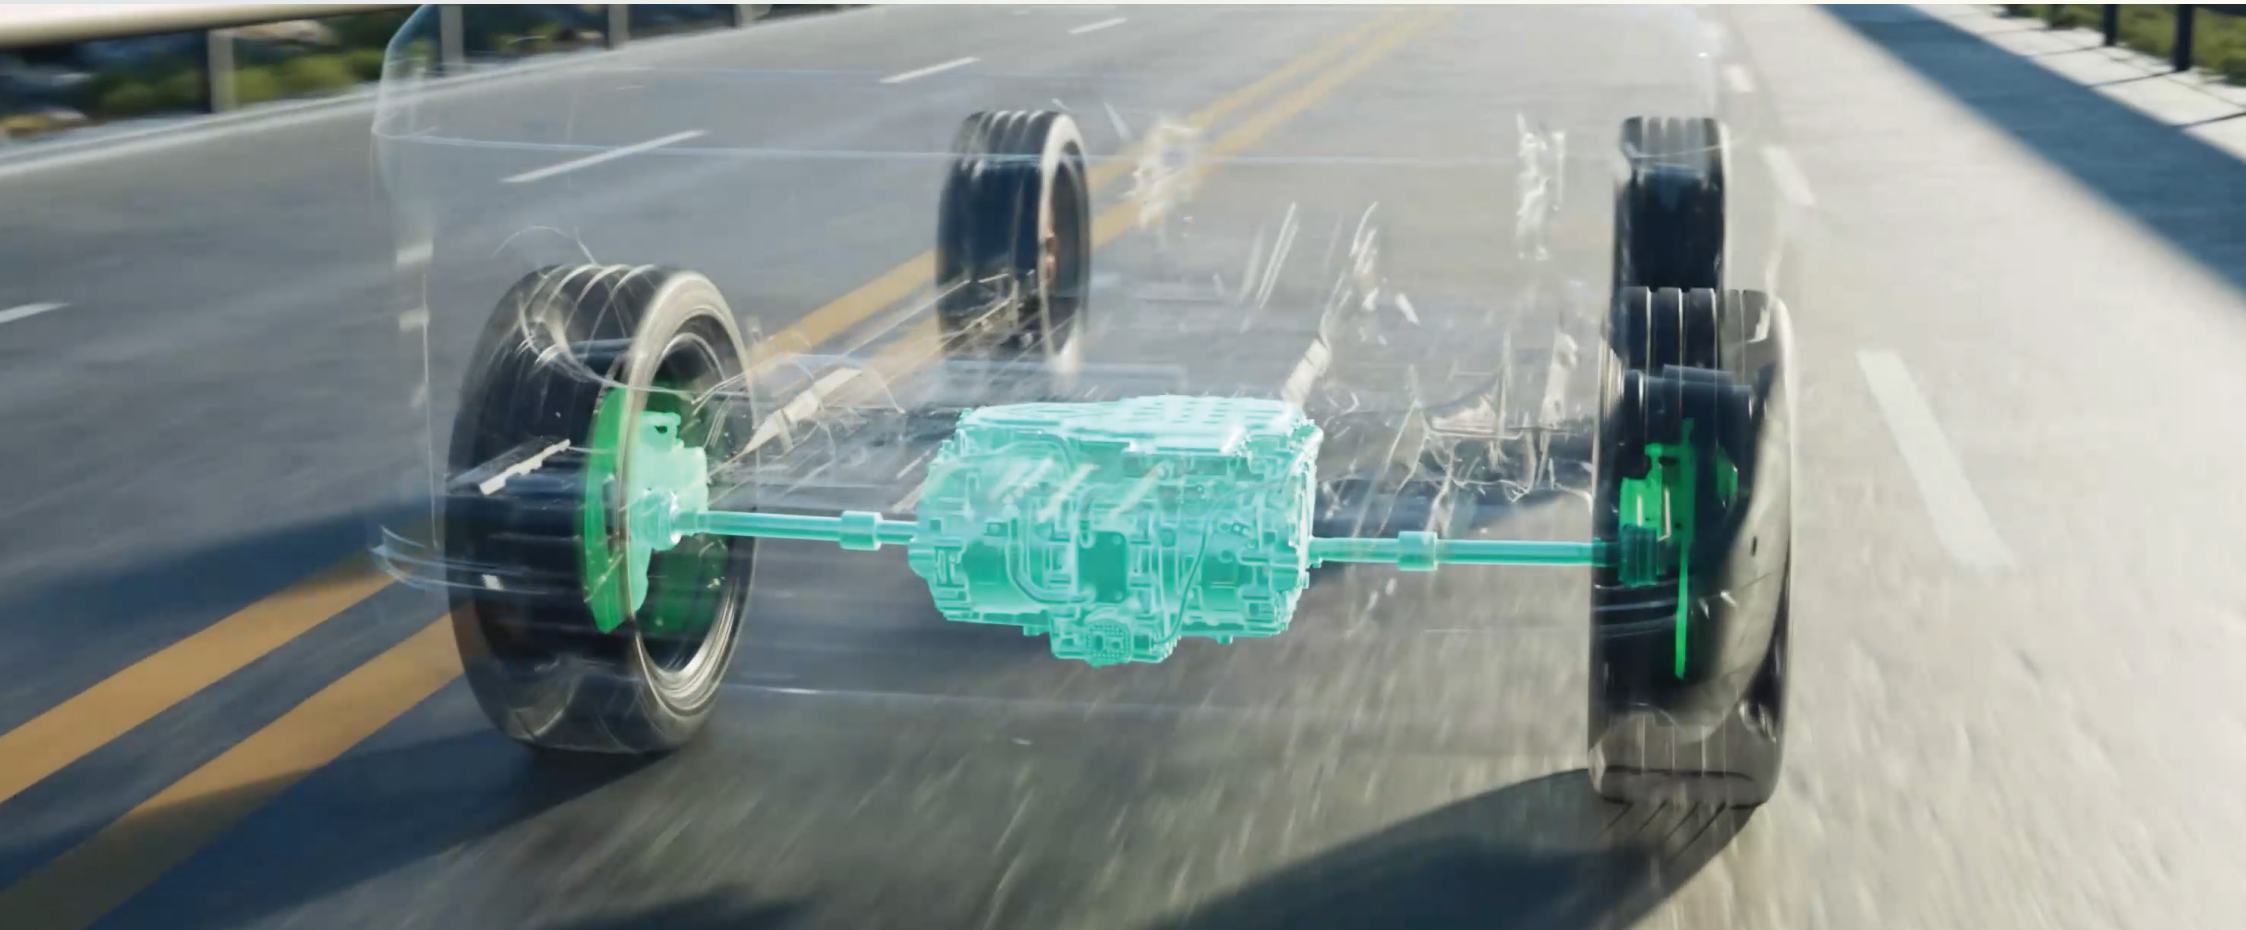

## \ Intelligent Performance & Advanced Engineering

Compared to the original SPA platform, SPA Evo introduces a completely reengineered technical foundation focused on intelligent performance, electrification, and dynamic control.

### Key Highlights

- Advanced flat-floor electrified architecture
- Larger battery integration for optimized efficiency
- Multi-motor hybrid powertrain capability
- Rear-wheel steering for improved agility and stability
- AI-controlled chassis systems
- NVIDIA Thor-powered high-speed electronic architecture
- Advanced adaptive air suspension
- Enhanced third-row structural protection

Together, these technologies create a more refined, stable, and intelligent driving experience while delivering premium ride comfort across all seating rows.

## Next-Generation SPA Evo Architecture

The Lynk & Co 900 is the first production vehicle built on the all-new SPA Evo platform — the next evolution of Volvo's original Scalable Product Architecture. Developed by Geely Group with engineering expertise connected to Volvo Cars and CEVT Sweden, SPA Evo is purpose-built for large electrified flagship SUVs, combining intelligent mobility, electrification, and premium driving refinement into one advanced architecture. Designed specifically for the future of plug-in hybrid and intelligent mobility, the platform supports advanced ADAS systems, software-defined vehicle technology, flat-floor packaging, and high-performance electrified powertrains while maximizing cabin comfort and interior space.

## Safety Inspired by Volvo Engineering Philosophy

Built around a philosophy deeply inspired by Volvo's world-renowned approach to safety, SPA Evo places structural integrity and family protection at the center of the Lynk & Co 900 experience. The architecture integrates advanced structural engineering solutions designed to enhance occupant safety, stability, and crash energy management.

### Advanced Safety Engineering Includes

- Full-coverage thermoformed steel side structures
- Integrated dual door-ring safety design
- Enhanced occupant protection for all three rows
- Optimized hybrid deformation zones
- Reinforced side-impact protection
- Intelligent driver assistance integration

The result is an SUV engineered to balance electrification, spaciousness, digital innovation, and premium safety standards without compromise.

## Benchmarking the Future of Premium Intelligent SUVs

The Lynk & Co 900 represents a new benchmark for intelligent electrified SUVs — combining advanced engineering, high-performance digital architecture, premium comfort, and next-generation safety technologies within one unified platform. SPA Evo establishes the foundation for a smarter, safer, and more connected future of mobility.
